

The new Rapidos explode into 1969!

What makes Rapido so hot? Why is it leaving other lightweights in the dust? Because Rapido packs 125 cc's of action on a clean, compact cycle that weighs in with the 80's and 90's, but accelerates past the 175's. Rapido takes to the trail like a rabbit hound and handles in traffic like a pussy cat. Low end torque, wheelies and effortless top speed — all for the price of a lightweight! Over 70 mph.
